

HA Competitive Trade-in: Sophos Firewall and XGS

100% off the first XGS Series plus 50% off HA unit and 8h of Professional Services for free when ordered with a 5-year term for Xstream Protection

[Valid until March 31, 2022]

Customers looking to scale up their protection for today's encrypted networks, without compromising on performance, can now make the switch from a competitive product to Sophos Firewall and the XGS Series [XGS 4300 and above]. A High Availability (HA) Active-Passive cluster only requires subscriptions for the active appliance. Use our Professional Services to give your customer the best possible start on their Sophos Firewall journey.

Offer valid for new prospects and Sophos customers without a firewall of any type only.

THE BENEFITS:

- **Powerful Protection and Performance:** The Xstream architecture in every XGS Series includes a dedicated hardware layer FastPath to accelerate important cloud, SaaS and other app traffic. This frees up resources on the main CPU for important deep packet inspection and TLS decryption for the traffic that needs it and significantly reduces overall latency.
- **No Compromise Connectivity:** With extensive built-in connectivity options to power the most demanding networks plus the flexibility to adapt, should the infrastructure change, the XGS Series are built to support customers over the full hardware lifecycle.
- **Xstream Protection:** A single license bundle for advanced protection with Network, Web and Zero-Day Protection plus the new Central Orchestration module for SD-WAN VPN orchestration* and a 30-day Central Reporting Advanced data retention period.
- **XDR-Ready:** Extend your threat intelligence beyond your firewall data with Sophos Extended Detection and Response [XDR]. Works in combination with other Sophos products which are licensed separately. See sophos.com/xdr for further details.
